# INTRODUCTION

## COVID-19 ON-SITE RECOMMENCEMENTS

Following on from the original CIS On-Site Recommencements Report from the 14th May, the CIS Research Team have continued an extensive exercise to get in contact with our network of industry contacts to further update and confirm their intention to recommence work On-Site following the Covid-19 lockdown.

Our researchers have established that 550 projects worth over €5m were On-Site pre Covid 19 and that 368 of these projects have now recommenced as of the 18th of May. Indeed many sites have already restarted and the research team will continue to track and monitor these to provide as much timely and relevant information for our customers so that they can target the right opportunities for them, get in touch with the right people, build a pipeline and make those all-important business decisions.

From the infographic below you will notice that the majority of projects (72%) are located in the Leinster region and Residential construction projects (58%) accounts for the majority when looking at the different sectors.

### Projects which have now recommenced as of 18th May
