

CIS

COMPANY CONNECTIONS

A Guide To Using
CIS Company Connections

With CIS Company Connections you can see the relationships between companies that interest you, who your competitors are working with, and use this key information to shape your pitch to work with companies on future projects.

Company Connections will feature as a tab beside the list of construction projects a company is working on and can be accessed via the company search functionality or by clicking on the hyperlinked company name in the contacts list on a project description page.

Premium customers can access the Company Connections tab via the Company Search function and will see a window similar to the screenshot below. They can view the projects that company is involved with and via the company connections tab, they can see who they're working with. Customers can see company contact details and the volume of projects shared between the two parties.
